SUBMISSION

Announcing Release of TheraDoc v4.7!

Premier is excited to share that the highly anticipated release of TheraDoc® version 4.7 is available!

Please take a moment and review the new enhancements that will improve your ability to protect your patients and maximize the performance of your organization.

Want to learn more about how Premier can help? Request a [DEMO](#).

NEW in TheraDoc v4.7

VAE Surveillance

FIND THE PATIENTS

Algorithmic-detection based on NHSN VAE criteria to identify candidate patients.

DOCUMENT YOUR FINDINGS

Infection Event form auto-created and populated for each candidate to facilitate investigation and further documentation.

FOCUS ON THE DATA

Assessment view for rapid completion of investigation and attachment of supporting evidence.

SHARE THE DATA

Infection Control Assistant® Dashboard report based on VAE classification.

Pharmacy Assistant Alert Review

CONSOLIDATE YOUR WORKFLOW

Consolidate alerts and surveillance lists in one place so you can quickly identify patients who require an intervention.

DIG INTO THE DETAILS

Clinical context and data you need within the documentation tools of the Pharmacy Assistant™.

WORK AS A TEAM

Review and address your patient alerts within the dynamics of a shared team environment. See what alerts have been dismissed by others and have the confidence that you are reviewing all of the alerts necessary to ensure quality patient care.

Antibiogram Analysis

ANALYZE THE DATA

Interactive summary of key organism and susceptibility results and trends.

FIND THE OPPORTUNITIES

Identify resistance patterns for select organisms based on susceptibilities and trend the resistance over time to improve stewardship efforts.

AGGREGATE ENTERPRISE DATA

Aggregate antimicrobial susceptibility information at the health system-level and provide facility-level reporting.

SLICE THE DATA

Generate antibiograms for specific areas within your facility such as critical care, pediatric, and medical/surgical units.

ACCESS THE UNDERLYING DATA

Export the patient level isolate data to Microsoft Excel for further ad-hoc analysis to support customized inquiries.

SHARE THE ANALYSIS

Make the data accessible to physicians, pharmacists, and other antimicrobial stewardship stakeholders by rendering the analysis as a PDF.

NHSN AU AND AR Data Submission

COMPILE

Generate the metrics required for monthly NHSN submission with TheraDoc's proven application of the complex NHSN business rules for both antimicrobial usage and antimicrobial resistance data.

REVIEW

Review reportable numerator and denominator data prior to NHSN submission.

PERFORM DETAILED VALIDATION

Export complete, patient-level data sets for thorough validation.

SUBMIT TO NHSN

Report your facility antimicrobial use and antimicrobial resistance data to the NHSN with confidence.
